

CLIMATE LEADERSHIP PROGRAM 2020

RESILIENCE INNOVATIONS AND CARBON FINANCE IN THE ASIA PACIFIC

- **Introduction**
- **CC Cluster Objective and Mission**
- **Climate Leadership Program**
- **CLP 2020**
- **Conclusion**

Introduction

- **CityNet**, The Regional Network of Local Authorities for the Management Human Settlements in Asia Pacific
- **Mission**, To connect urban actors and deliver tangible solutions for cities across the Asia Pacific region
- **Established** in 1987 with the support of UNESCAP, UNDP and UN-Habitat
- **Membership**, The 163 members of CityNet consist of Government, Academician, Business, and Communities
- **4 Networks** in CityNet related to Infrastructure, Disaster, SDGs, and **Climate Change Clusters**

CC Cluster Objectives

- Understanding CC as **a global challenge that requires local or city acts**
- Understanding CC should be anticipated from many **aspects (multi dimensional)**
- Understanding the anticipated of CC is characterized by **uncertainties, complexity and conflict of interest**
- Understanding **the leaders are the key role players**, To strengthen leadership competence and maintain responsive mindset to accommodate **innovative initiatives** in making collaborative action with all stakeholders
- Developing a shared understanding of **CC actions** and to **act as leaders (Innovators)** in making collaborative action
- Facilitating a **potential collaboration** amongst cities, organizations, institutions as a way to combat climate change for a better, greener and smarter city toward resilient and sustainable cities

What we Have Done on CLP Workshop and Training

- **CLP1 workshop focused on leadership and city management under CC impacts, which will include CC overview, process and introduction to relevant instruments, such as System Design Thinking and U theory**
- **CLP2 workshop focused on building vision of the future city management and leadership development, which contained: collective action, multi-stakeholders dialogue, future city management, reflection into prototype idea**
- **CLP3 workshop and training focused on sharing experiences in running individual and collective leadership, and create prototyping (pilot projects) as innovative CC action**

Climate Leadership 2020

- To learn and familiarize **a leadership** and problem-solving approaches using systems design thinking while **analyzing climate-related and the post covid-19 challenges**;
- Overview any **on going mandates** that related to Carbon Governance on Paris Agreement, NDC, NAMA etc, and how far Participation of Cities on **Low Carbon Development** (Climate Mitigation Strategy, Target, Policies, action Plan)
- To **exchange information** and insights on emerging global trends, regional situations on climate change, private sector-led opportunities. local innovations and sustainable urban solutions relative to low carbon
- To understand **the potential of project Carbon finance and Carbon Market Mechanism**
- To present **different strategies city governments** are implementing relative to financing climate adaptation and mitigation activities
- To learn on **the different prototypes on climate change solutions** and build further conversations as to how they can scale up and raise the prospect of replications to other countries
- To **identify action plans** and develop further prospects on resilient city to city cooperation using different City and other regional platforms

CONCLUSION

- **Cities have to have a climate action plan related to a framework and international guidance for GHG emission reductions and target**
- **Cities have to have a contribution for Global and National Commitment for Low Carbon Development**
- **Cities have to formulate policies, instruments, roadmap, model, tools and targets related to CC mitigation and adaptation**
- **Cities have to evaluate their CC mitigation and adaptation process and its outcomes where innovation and leadership acts by solving the challenge and answering the questions**

THANK YOU

CLP, September 2020
