

## General Call for Participants CityNet – Kuala Lumpur Regional Training Center 33<sup>rd</sup> Session: GHG Emission Reduction and Low Carbon Society April 22-24, 2019, Kuala Lumpur<sup>1</sup>, Malaysia

CityNet and Kuala Lumpur City Government are organizing its 33<sup>rd</sup> KLRTC Session on April 22-24, 2019 tackling on urban solutions to climate change.

The learning program is geared towards climate change mitigation and adaptation actions focusing on emission reduction and building low-carbon society on the city level. Thematic discussions include:

1. Basic Principles and Climate Actions on Greenhouse Gases (GHG) Emission Reduction;
2. Climate Action Plan in the Asia Pacific;
3. Low Carbon Solution Policies;
4. Strengthening Infrastructure to Support the Implementation of Low-Carbon Strategies

### Program Objectives

1. Understand the importance of strengthening Innovative and Localizing Climate Change Actions from various Global Agenda;
2. Strengthen CityNet member cities' dialogue and multi-stakeholder cooperation in climate change and low carbon development fields;
3. Share best practices on low carbon action and climate change adaptation/mitigation;
4. Raise level of awareness among city officials on the complexity of climate change that requires a holistic approach;
5. Encourage peer learning, networking, multi-stakeholder collaboration between cities and development partners, and the formulation of possible partnerships among CityNet member cities.

The Program will provide a platform for sharing best practice approaches, learnings and insights among CityNet, non-CityNet members, and regional development experts.

Technical presentations, group discussions, interactive work sessions, networking and site visits will feature the three-day event.

### **Workshop Program Highlights (tentative)**

- Day 1
  - Basic Principles and Climate Actions on GHG Emission Reduction/ Mitigation
  - Climate Action Plans in Asia Pacific
  - Low Carbon Solutions and Policies
- Day 2
  - Infrastructure Adaptation
  - Building Energy Efficiency
  - Sustainable Urban Mobility
  - Case Presentations
- Day 3
  - Site Visits

### **Target Participants**

City mayors, senior city managers, urban planners, environmental officers and other key urban leaders and decision makers

### **Language**

The program will be delivered in English.

### **Preparation**

Participants are advised to prepare one (1) poster briefly discussing the impacts of their successful urban solutions on climate change adaptation and mitigation. Poster preparation guidelines will be sent to successful applicants.

### **How to apply**

Apply online at <http://bit.ly/klrtc33>

For other information regarding application procedure, email at [programs2@citynet-ap.org](mailto:programs2@citynet-ap.org)

**Deadline for the registration is on February 22, 2019, Friday.**

### **About the Organizers**

**CityNet** is the largest association of urban stakeholders committed to sustainable development in the Asia Pacific region. Currently, it has over 139 cities, non-government organizations, private companies and research centres as members.

### **Kuala Lumpur Regional Training Centre (KLRTC)**

**(KLRTC)** was formed as a joint initiative between UNITAR, UNDP, CityNet, the City of Kuala Lumpur and Veolia Environment to promote the exchange of expertise in urban planning and environmental management. KLRTC provides training to city mayors, senior city managers, and urban practitioners in the tools and best practices of sustainable development. It is managed by the City Government of Kuala Lumpur.

**The City Government of Kuala Lumpur** is the current Second Vice President City in the CityNet's Executive Committee and the co-leader of the Infrastructure Cluster.
