

2020 Global Smart Solution Report

Call for City Solutions

to achieve SDG 11

SDG 11:

**Inclusive, Resilient,
and Smart
Sustainable Cities**

Submission
Deadline:

August 31

Organizers:

ICDI國際氣候發展智庫
International Climate Development Institute

The Global Smart Solution Initiative was launched with the vision to put the Bonn-Fiji Commitment into practice and live up to Sustainable Development Goals. The Bonn-Fiji Commitment, issued during COP23, signifies the strong commitment of local and regional leaders working in partnership with all levels to achieve the Paris Agreement.

During the Initiative, we call for cities to share their smart solutions to achieve urban sustainability through submitting city cases. The Best Practices will be featured in the Global Smart Solution Report and promoted during the

UNFCCC COP and Smart City Summit & Expo every year.

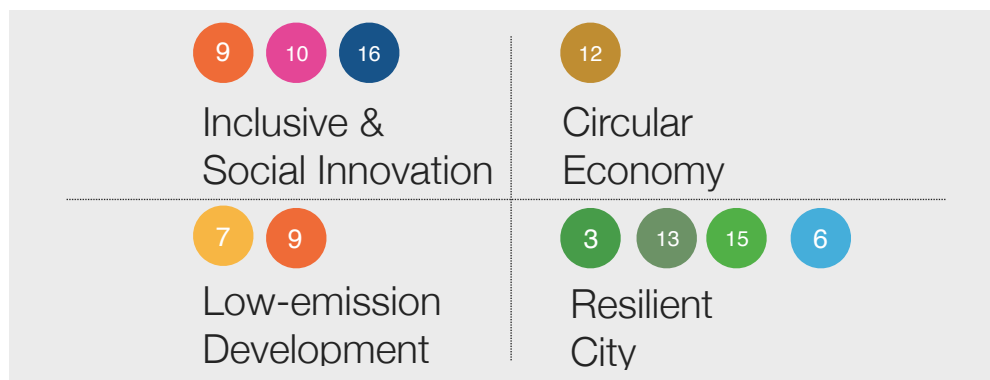

The theme for the initiative this year is **"Inclusive, Resilient, and Smart Sustainable Cities."** We invite cities to join this initiative and share your innovative solutions to achieving SDG 11.

For more information or case submission, please go to ICDI's official website (www.icdi.network), or contact us via email: icdi.secretariat@gmail.com

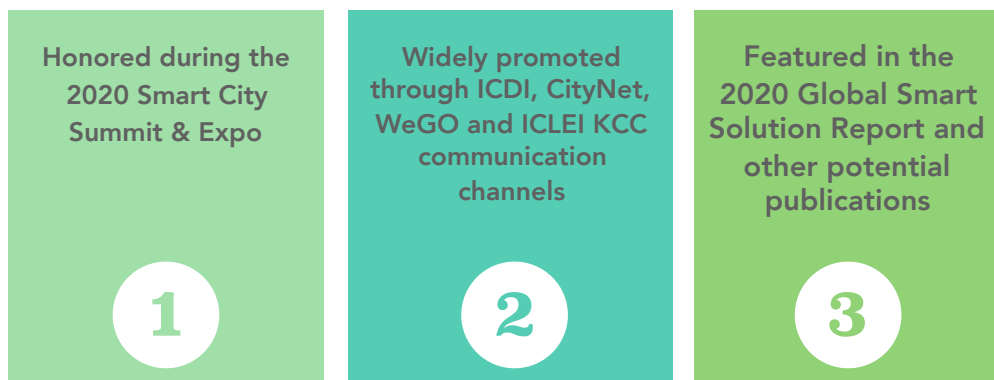

About the Global Smart Solution Initiative

Topics for submission

The best case submissions will be awarded by being:

Evaluation Procedure

The evaluation for the 2020 Global Smart Solution Initiative submissions will be performed by a panel of judges, consisting of eight or more leading experts in Sustainable Development, Urban Planning and Smart City Programs.

The submitted cases will be evaluated through **seven criteria**:

- Compatibility/ Significance
- Innovativeness
- Effectiveness/Synergy
- Replicability/Transferability
- Scalability
- Ecological responsibility
- Human-based approach

Global Smart Solution Report

The first Global Smart Solution Report was launched in 2018, building on the momentum of the 2018 Taipei Smart City Summit & Expo (SCSE).

We received twelve submissions in our first report, and then successfully launched the "2019 Global Smart Solution Report: City Challenges and Innovations" during COP24 and 2019 SCSE.

The report outlines ten diverse urban challenges that cities have faced and further provides an overview of practical solutions applied to achieve their goals of inclusive, safe, resilient and sustainable human settlements.
